

# **New Hartford Land Trust Slide Lecture and Presentation**

## **SNAKE WORMS ARE HERE!**

**A NEW INVASIVE  
species, related to the  
beneficial earthworms...  
Learn about these harmful  
newcomers from a Yale  
researcher!**

**When: 7:00 p.m.  
Thursday, April 18, 2019**

**Where: Licia & Mason Beekley  
Community Library  
10 Central Avenue, New Hartford**

**Presenter Dr. Annise Dobson is a postdoctoral researcher in the Forestry and Environmental Studies School at Yale University. Her research focuses on the impacts of jumping worms (aka snake worms), white tailed deer and other stressors on native plant communities in the Northeast. Currently, she is identifying the movement of jumping worms through New York City, and their impacts on plant communities. Join us to learn how to identify and manage these worms that are affecting our woodlands and gardens. Bring your questions!**
